FEATURERS & BENEFITS

CONSTRUCTION
1-1/4" Type 304 Stainless Steel pipe and fittings along with cast finished stainless steel 9" (22.9 cm) diameter floor flange provide a superior defense in a highly corrosive environment.

QUALITY CONTROL
Eye/face wash and valve assembly are pre-built and fully water/pressure tested to ensure no leaks and proper function which ultimately reduces installation time.

BOWL
The 11" (27.9 cm) round stainless steel receptor is supplied with a No. 2L bright finish on its exterior.

VALVES
Eye/face wash valve is designed to make the flushing of contaminants occur with the simple push of a stainless steel flag. Shower ball valve is designed to make the flushing of liquid occur with the pull of a triangular lever. Both are made of Type 316 stainless steel.

STRAINERS/FILTERS
Type 304 Stainless Steel in-line 50 x 50 mesh water strainer supplies added protection against corrosion and prevents debris from reaching the eye/face wash so the 8330 stays functioning at its best. Strainer is easily serviceable. Stainless steel dust cover protects eye/face wash head as well as bowl up until the last second before use further optimizing operation.

EYE/FACE WASH
AXION® MSR eye/face wash head (patent pending) uses an inverted directional laminar flow to sweep contaminants away from the vulnerable nasal cavity.

OPTIONS

- Thermostatic Mixing Valve: Model 9201E AXION® Emergency Tempering Valve thermostatically mixes hot and cold water to provide a safe fluid supply for emergency showers and eyewash equipment, with a flow rate of 31 gpm (117.3 L).
- Emergency Alarm System: Model 9001, 1-1/4" 120 VAC emergency alarm and light system. Buzzer and flashing light are activated by an 1-1/4" double pole, double throw flow switch.
- Dust Cover: Model 9102 is a stainless steel cover that protects the eyewash heads as well as the bowl. (Picture shows cover mounted to an eyewash.)
- ANSI Shower and Eyewash Testing Kit: Model 9011 ANSI compliance test kit.

APPLICATIONS

In an environment where materials need to withstand the greatest corrosion, where eyes, face, or body of any person may be exposed to these injurious or corrosive materials, suitable facilities for quick drenching or flushing of the eyes, face, and body shall be provided within the work area for immediate emergency use. Emergency eye/face wash facilities and deluge showers shall be in unobstructed and accessible locations that require no more than 10 seconds for the injured person to reach. Model 8330 is certified by CSA to meet the ANSI Z358.1 Standard for Emergency Eyewash and Shower Equipment.
