MAINTENANCE: Periodically clean the strainer. Refer to 5874 Series Valve Manual for more information.

INSTALLATION PROCEDURE

1. For all plastic push-in type fitting connections, only connect NSF-61 copper or plastic tubing. Stainless steel or glass tubing is not recommended. The following assembly instructions must be followed to ensure a watertight connection:
 - a. Cut tubing square and clean.
 - b. Mark from end of tube the length of insertion (See table below).
 - c. Push tube into the fitting until it bottoms out.
 - d. To remove, depress collet and pull tubing out.

Tube Sizes	O.D. Tolerance	Insertion Depth
1/4"	±.005"	11/16"
3/8"	±.005"	3/4"
1/2"	±.005"	7/8"

CLEANING INSTRUCTIONS FOR HI-POLISHED STAINLESS PRODUCTS:

Haws' recommended cleaning procedure for hi-polished stainless products is as follows: Use a mild detergent or soap and water for removing stains and fingerprints or use a clean cloth with window cleaner.

BOTTLER FILLER BRACKET:

If installing the bottler filler in new construction, use Model 6700 or 6700.4L Mounting Plate. Follow the installation instructions supplied with the 6700 or 6700.4L for mounting dimensions. Reference Page 5-9 of this document for 1920/1920HPS/1920W button heights when mounted over different Haws drinking fountains.

If installing as a retrofit in old construction, it is recommended to use Model 6700 or 6700.4 Mounting Plate behind the finished wall. If that is not possible, it is recommended to install wood stud cross-braces behind the wall and mount the 1920/1920HPS/1920W directly to the wood support. If that is not possible, Model 6700R Retrofit Plate may be used. Follow the installation instructions supplied with the 6700R.

If installing as a standalone bottle filler, use the mounting hole location diagram on Page 5 and bolt the 1920/1920HPS/1920W securely to the wall.
