RENOWN HEALTH UPGRADES THEIR HYDRATION OFFERING

Reno, Nevada

BACKGROUND

Northern Nevada's Renown Health™ is a nationally recognized health network with various large and small healthcare facilities committed to providing excellence and innovation in all aspects of its operations. Its main campus, the Renown Regional Medical Center, emphasizes a commitment to quality, which drives every decision – from patient care safety practices to remodel considerations to the best choice for employee and visitor hydration.

OBJECTIVE

As the largest integrated health network in northern Nevada, the facilities of Renown Health cater to thousands of employees, patients and visitors on a daily basis. During a recent remodel, the hospital saw an opportunity to replace dated five-gallon water jugs in various locations throughout the large facility. The goal was a hydration solution that would reduce costs and clutter while offering cleaner water to better align with Renown's commitment to quality in every aspect.

SOLUTION

With its hygienic, touch-free activation and ADA compliance, the Hydration By Haws™ bottle filler was an ideal upgrade, particularly for a facility where cleanliness is critical. Utilizing an advanced filtration system, these hands-free dispensers deliver clean, filtered water from standard tap lines. The coconut carbon block filter carries NSF/ANSI certifications and lifecycle control accurately monitors filter usage, ensuring great-tasting water with every activation.

RESULTS

Sue Singleton, Imaging/MRI Supervisor at Renown Health is pleased with both units as they have proven successful with employees, patients and visitors alike. The *Hydration By Haws* bottle fillers are a tidier and more hygienic option than the dated, messy five-gallon jugs previously used in both the waiting room and imaging department. Both areas see a steady stream of employees, visitors and patients, and the reliable *Hydration By Haws* water dispensers are welcome additions to a facility committed to quality.

ABOUT HYDRATION BY HAWS™

Hydration By Haws water dispensers offer users the benefits of clean filtered water away-from-home without the waste and cost of bottled water. The multiple product options transform regular tap water into filtered drinking water using a certified advanced filtration system. *Hydration By Haws* water dispensers are certified according to NSF/ANSI Standards 42 & 53 for the reduction of chlorine (taste and odor), lead, and 99.99% of cysts.
