Location of Unit: The Model 8901RFK Hose Spray can be installed at any 1/2" NPT port, pressure side. (See installation drawing). Fittings supplied make kit adaptable to eye/face wash, shower, and combination models. In order to comply with state codes, the use of a vacuum breaker is required with all eye/face wash and body spray units (Haws offers Model SP212).

Supply Line: The minimum recommended line size is 1/2" IPS with 30-90 psi (2-6 ATM) pressure. Where sediment or mineral content is a problem, an inlet filter is recommended.
