Quality that delivers. Design that captivates.

Haws has a well-earned reputation for designing and manufacturing the highest quality hydration products in the industry. And with the introduction of the all-new EWC 1200, we’re building on that reputation for the future.

Essential to any project.

Designed with the installer in mind, the unit provides large clearances inside to allow for easy installation, filter replacement, and maintenance. The EWC is the only water cooler that combines a self-adjusting flow control with a laminar flow insert in the bubbler head nozzle. In addition, certain models have standard features that would be costly upgrades for other companies, including stainless steel finish, energy savings mode, LED electronic display, and bottle filler light. All of these features make the EWC the most economical and modern choice on the market.

Introducing the All-New EWC 1200
Introducing The EWC 1200
The New Standard in Electric Water Coolers.

- Integral anti-microbial properties
- Anti-rotational bubble head to help prevent vandalism
- Industry-leading bottle fill rate (1.1 gpm)
- Integral laminar-flow technology
- Patent-pending enhanced tankless water cooler for consistently cooled water during use
- Patent-pending, self-leveling mounting system ensures flush alignment every time
- Enhanced electronics to ensure filtered water at every activation (for filtered units only)

- Intuitive LED display with sensor activation and easy maintenance notification and controls
- Durable stainless steel body and fountain
- Litghted bottle filler dispenser
- Carbon block filter cartridge
- Service life: 1 year or 3,000 gallons (11,356 L)
- 100% Lead-free waterways
- Large clearances make filter replacement and maintenance easy
- Designed with retrofit capabilities
- Smart energy saving capability is standard (filtered and bottle filler units)
- Quiet Operation

Ease of installation and maintenance entice beyond its attractor, durable design. Built-in energy saving features, and wear-resistant materials and components make the EWC the obvious choice.

The clean lines are merely the visible cutting-edge features with the most creative innovations inside the contemporary shell. From the proprietary electronics that drive the intuitive LED display, to the accessible configuration of the internal mechanics, this unit captivates as it outperforms the competition.

A competitive price point with unmatched design features backed by quality and only expect from Haws,™ the EWC is essential for any new construction or retrofit project.

Haws has a well-earned reputation for designing and manufacturing the highest quality hydration products in the industry. And with the introduction of the all-new EWC 1200, we’re building on that reputation for the future.

Essential to any project.

Designed with the installer in mind, the unit provides large clearances inside to allow for easy installation, filter replacement, and maintenance. The EWC is the only water cooler that combines a self-adjusting flow control with a laminar flow insert in the bubbler head nozzle. In addition, certain models have standard features that would be costly upgrades for other companies, including stainless steel finish, energy savings mode, LED electronic display, and bottle filler light. All of these features make the EWC the most economical and modern choice on the market.

Introducing the All-New EWC 1200

Model 1201SF
Single, stainless steel, filtered electric water cooler

Model 1202SF
Hi-Lo, stainless steel, filtered electric water cooler

Model 1211SF
Single, stainless steel, filtered electric water cooler with bottle filler

Model 1212SF
Hi-Lo, stainless steel, filtered electric water cooler with bottle filler

All models have filter or non-filter options
