SPECIFICATIONS

Model 6422 quick change replacement filter cartridge is a carbon bed cartridge with a 20-micron post filter designed to effectively reduce unwanted tastes, odor and chlorine taste & odor from drinking water. The cartridge filter is easily changed with a quarter-turn of the filter. Water is automatically shut off during the change eliminating the need for additional shut-off valves to and from the filter system. The 6422 provides a filter life of 2500 gallons (9463 L). Filter is tested and certified by NSF/ANSI to Standard 42 for the reduction of Chlorine Taste & Odor.

APPLICATIONS

Model 6422 filter is designed for the Hydration Station®, and has a 2500-gallon filter life. Product is compliant to California Health and Safety Code 116875 (AB 1953-2006).
