SPECIFICATIONS

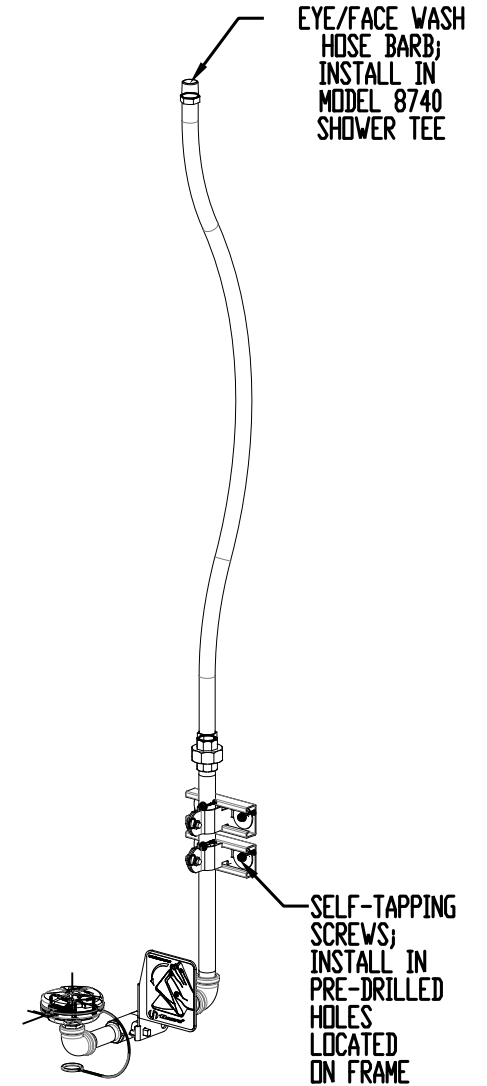

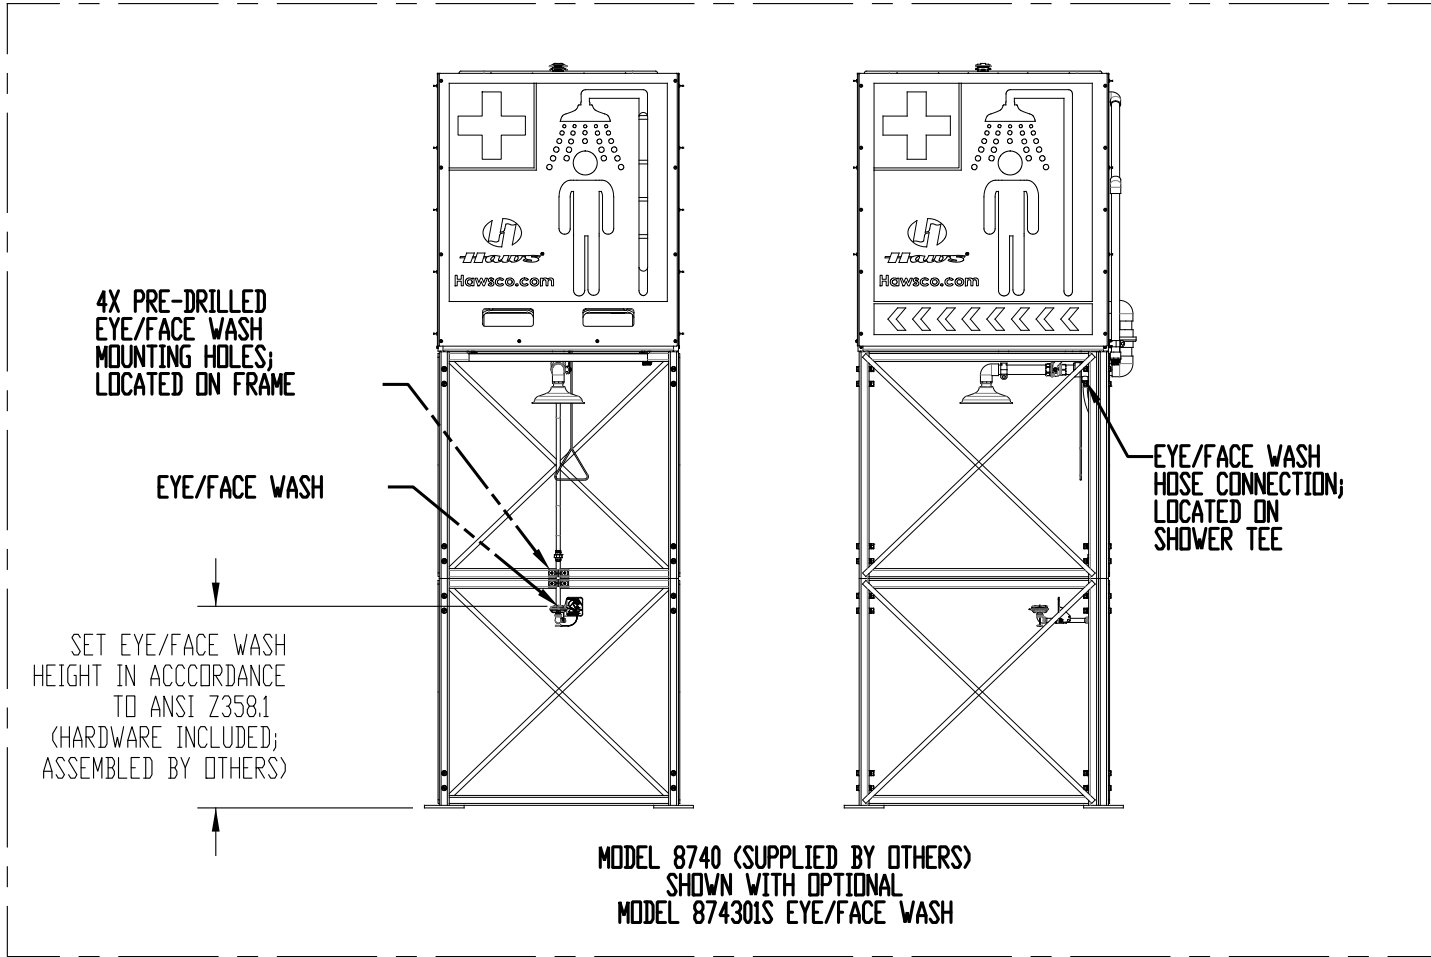

The Haws 874301S eye/face wash option for the model 8740 overhead tank shower uses the medically acclaimed AXION® MSR eye/face wash head for emergency flushing. The green ABS plastic head uses an inverted directional laminar flow to sweep contaminants away from the vulnerable nasal cavity, and is protected by a yellow plastic pop-off dust cover. Assembly includes a chrome-plated brass ball valve with stainless steel ball and stem, galvanized piping and flexible polyvinyl tubing to allow it to be fitted to the 8740 by the customer. Refer to the Operation and Maintenance Manual for instructions. Eye/face wash valve is designed to make the flushing of the contaminants occur with the simple push of a stainless steel flag.

APPLICATIONS

Specifically designed to be used with the 8740 overhead tank shower.

NOTES:

- EYE/FACE WASH MATERIAL:**
 PIPE & FITTINGS: GALVANIZED STEEL
 VALVE: BRONZE
