

TOUCHLESS HYDRATION POWERED BY HAWS®

Haws® offers various motion-activated hydration options for sanitary activation in public places. The touchless electric sensor allows for hands-free operation with a simple front motion, eliminating the need for manual activation. All units provide easy to follow instructions for in-field installation.

DRINKING FOUNTAIN AND BOTTLE FILLER PRODUCTS

Top Drinking Fountains incorporated with a sensor-operated solenoid valve.

SENSOR UPGRADE

In-field conversion of *Haws* indoor drinking fountains to touchless operation with our sensor and solenoid valve retrofit kit.

Model: RKHO Series

Electric sensor and solenoid valve retrofit kit with hard-wired or plug-in transformer converts many *Haws* fountains and 1920 bottle fillers to be operated hands-free.

Before

After

The CDC recommends all facilities develop a comprehensive water management program for your water system and all devices that use water. This includes regular cleaning of decorative water features, such as fountains and be sure to follow any recommended manufacturer guidelines for maintenance and cleaning.¹

Universal & International Plumbing Code requirements state bottle fillers are only permitted to be substituted for drinking fountains up to 50% of the occupant load requirements for drinking fountains.²
