

# AXION Advantage<sup>®</sup>

## Achieve Compliance and Solve Your Most Common Emergency Eye/Face Wash & Shower Flow Problems with a Haws<sup>®</sup> AXION<sup>®</sup> Retrofit Kit

Haws AXION Advantage<sup>®</sup> is a simple, cost-effective solution to mitigate your most common flow problems, including:

### Lack of Simultaneous Flow

When installed together, the AXION<sup>®</sup> MSR eye/face wash and showerhead effectively re-distributes water providing a consistent flow rate that meets simultaneous flow requirements.

### Lack of Controlled Non-Injurious Flow

AXION<sup>®</sup> MSR products provide laminar flow eye/face wash streams for even, consistent, predictable stream height and circumference for greater user comfort, encouraging use for the full 15-minute ANSI Z358.1 requirement.

### Uneven Flow Pattern

AXION<sup>®</sup> MSR provides a controlled flow to both eyes simultaneously with comfortable water pressure.

AXION<sup>®</sup> provides compliance on the spot at a significantly lower cost than replacing an entire unit. With included parts, AXION<sup>®</sup> retrofit kits convert 80% of existing competitor units and can update them from a face wash to an eye/face wash, ensuring full eye and face flushing.

Leveraging Haws patented technology, AXION<sup>®</sup> provides laminar flow and an inverted water stream to ensure increased victim comfort while sweeping contaminants away from the eye.
