

AXION Advantage®

Achieve Compliance and Solve Your Most Common Emergency Eye/Face Wash & Shower Flow Problems with a Haws® AXION® Retrofit Kit

Haws AXION Advantage® is a simple, cost-effective solution to mitigate your most common flow problems, including:

Lack of Simultaneous Flow

When installed together, the AXION® MSR eye/face wash and showerhead effectively re-distributes water providing a consistent flow rate that meets simultaneous flow requirements.

Lack of Controlled Non-Injurious Flow

AXION® MSR products provide laminar flow eye/face wash streams for even, consistent, predictable stream height and circumference for greater user comfort, encouraging use for the full 15-minute ANSI Z358.1 requirement.

Uneven Flow Pattern

AXION® MSR provides a controlled flow to both eyes simultaneously with comfortable water pressure.

AXION® provides compliance on the spot at a significantly lower cost than replacing an entire unit. With included parts, AXION® retrofit kits convert 80% of existing competitor units and can update them from a face wash to an eye/face wash, ensuring full eye and face flushing.

Leveraging Haws patented technology, AXION® provides laminar flow and an inverted water stream to ensure increased victim comfort while sweeping contaminants away from the eye.
