

EWC COMPARISON HAWS® VS. ELKAY

1. Contemporary design
2. Hygienic and durable stainless steel finish
3. Open & easy access for installation & filter replacement
4. Simple bubbler shut off and removal (if desired for pandemic response)

1. Outdated look
2. Excessive plastic
3. Cramped unit & filter access
4. Difficult bubbler shut off

Essential to any project.

Designed with the installer in mind, the unit provides large clearances inside to allow for easy installation, filter replacement, and maintenance. The EWC is the only water cooler that combines a self-adjusting flow control with a laminar flow insert in the bubbler head nozzle. In addition, certain models have standard features that would be costly upgrades for other companies, including stainless steel finish, energy savings mode, LED electronic display, and bottle filler light.
