ADA Freeze-Resistant Vandal-Resistant Drinking Fountain & Bottle Filler

FEATURES & BENEFITS

CONSTRUCTION

Unit is made of 18 gauge Type 304 stainless steel with a satin finish that resists stains and corrosion, and has soft, rounded corners. Unit features stainless steel satin finish back panel, vandal-resistant bottom plate, and 1-1/4" integral trap.

FREEZE-RESISTANT VALVES

Fully engineered system with the pneumatic-operated, freeze-resistant valves mounted in cabinets that are installed on the inside wall where room temperature does not drop below 50° F (10° C). When valve goes to off position, water left in supply line between valve and bubbler drains back into waste inside cabinet, protecting the unit from freezing, and allowing fountain to function year-round.

BACK PANEL

Stainless steel back panels helps to protect the wall from inadvertent splashing, and its decorative satin finish increases location visibility.

BARRIER-FREE

Barrier-free capabilities combined with its ease of use allows for a number of installation location possibilities.

BUBBLER HEADS

Polished chrome-plated brass bubbler heads with integral basin shank for added strength. Shielded, angled stream opening provides a steady, sanitary source of drinking water at .45 gpm.

VANDAL-RESISTANT

The bubbler heads, push buttons, drain strainers and bottom plates are locked in place, discouraging unwanted vandal tampering.

BOTTLE FILLER

Vandal-resistant, 14-gauge Type 304 stainless steel bottle filler housing with push button operation and 1 gpm (3.78 L) laminar flow.
