

VANDAL RESISTANT SENSOR-OPERATED ELECTRIC WATER COOLER

model 1211SF

Industry leading features enhance the *Haws Hydration Station™* touchless portfolio vandal resistance. The sensor operated Electric Water Cooler retains hands-free operation while providing extensive vandal resistant features that meet or exceed competitive options.

Ideal for high-traffic educational, transportation, and recreational installations. Multiple configuration options available.

VANDAL RESISTANT FEATURES INCLUDE

- Best-in-Class vandal resistant touchless bottle filler sensor. Resistant to scratching from knives or razors, abrasion, dirt and regular use buildup
- Easy-to-install replaceable sensor module (if required)
- Anti-rotational bubbler head prevents twisting or pulling out of position (optional stainless-steel bubbler available for extra heavy-duty applications)
- Vandal resistant hidden fasteners and tamper resistant screws used throughout
- Automatic water shutoff prevents flooding if permanent blockage of touchless sensor is detected or if any button is blocked in the "on" position
- Hidden programming buttons and menu discourage tampering and do not require major disassembly to gain access to adjustable menu functions
- Heavy duty patented universal mounting bracket reduces ability to remove unit off wall or damage by pulling
- Deep bottle filler drain basin captures rinsing and emptying of larger water bottles without water spilling over and onto floor
- Smooth bowl without seams or screws, prevents prying of bowl or removal of exposed screws
- Galvanized steel frame and support structure impact tested and approved to meet Uniform Plumbing Code requirements
